

Job Title: **Human Trial Clinician**

Reference: **ENG-049**

## About EERS

---

Founded in 2014, EERS Global invents, designs and tests in-ear advanced technologies to accelerate go-to-market of game-changing products. Our cutting-edge technology augments the human experience in communication in challenging situations, hearing protection, biometric and wellness monitoring, brain computer interfacing, and is repeatedly validated in the field and some have become an ANSI [Standard](#).

Through co-development partnership, we bring a stream of new products to market. Beyond prototyping, we produce actual scalable, easily transferable, manufacturable product taking the development execution risk out of the equation.

A global centre of excellence in research in acoustics, audio and biosignal processing, in-ear technologies and product development, we attract high-caliber scientists and engineers to our team. Our head office is located in the heart of downtown Montreal. We offer competitive salaries as well as a great team environment. EERS Global is an equal-opportunity employer committed to diversity.

## Job Description

---

Reporting to the Director of Production, the **Human Trial Clinician** is responsible for scheduling, executing, and documenting trials involving human subjects for EERS. This initiative will require the successful candidate to work closely with the Production Department to prioritize activity to optimize the support of overall prioritized workflow being executed by multiple research groups. Once alignment is established, the candidate will be responsible for liaising with the specific research group requesting the testing to develop trial protocols.

## Duties and Responsibilities

---

- Develop test protocols based on expert feedback in combination with candidate knowledge of trial best practices
- Organize and execute tests and their logistics
- Formulate reports on tests with key observations where needed
- Contribute where needed in the development team
- Attend and participate in department and client meetings
- Organizational workflow support

## Education and work experience

---

- Bachelor's or other degree in Science
- 1-2 years of experience on human subject trials

### Minimum Knowledge, Skills & Abilities:

- Strong methodological abilities and technical aptitude: exhibit a structured and detail-oriented approach
-

- Knowledge and experience in questionnaire design
- Familiar with data logging & analysis
- Effective written and verbal skills in English / French
- Excellent people and communication skills: ability to accept directions, provide and receive constructive feedback
- Knowledge of workflow management systems such as Click Up and Gitlab (an asset)
- Excellent analytical and problem-solving skills
- Strong time management and organizational skills; ability to handle multiple tasks, be punctual, and respect deadlines
- Ability to work both autonomously and collaboratively as part of multi-disciplinary teams
- Self-motivated and focused
- Proficiency with the Microsoft Office Suite (Word, Excel, Outlook)

**Nice to have**

- Knowledge of Reaper, Audacity, Matlab and Teensy
- Experience with and around acoustic equipment
- Experience with data collection apps
- Familiar with soundcards and routing

If you are meticulous, a problem solver, and a team player, you will feel right at home. Please send your cover letter and/ or resume to [cv@eers.ca](mailto:cv@eers.ca) OR submit them through our [EERS Career platform](#).
